NRMA CareFlight helicopter rescue service works closely with Opentec and has a good relationship with them. The company has a good understanding of our requirement and has helped integrate the Openfire Rugged Portable Computer into our difficult environment.

We use the Openfire Series – Rugged Portable Computer in our helicopters for AUTOMATED POSITION MAPPING. It performs well in all conditions and takes the knocks that are inevitable in our day to day duties.

The comments from our flight teams are:

THE SYSTEM IS RUGGED

THE RELIABILITY IS SOLID

THE SUPPORT IS DEPENDABLE

Ian Badham  
Executive Director  
NRMA CareFlight
