

Openfire Rugged Computer Range

The Opentec 'Openfire' range of portable PCs and PDAs combine truly rugged design with desktop processing power, so you can take previously deskbound applications into the field.

RPC IV RANGE: 13" & 15" Rugged Notebook PCs

These are not executive toys, but high performance tools for the field-based professional who demands reliability.

With a choice of 13" or 15" backlit LCDs, and Intel Centrino processors to suit your application requirements, plus a comprehensive array of external device ports and connectivity options (including GPRS, Next-G and wireless LAN), the RPC-IV was designed in Australia to meet the extremes of the Great Australian Outdoors. Available in either 'Industrial' or 'Military' versions; with the 'M' variant including the option of MIL-STD461E compliant very low emission electronics.

RPT IV RANGE: 8.4" & 10.4" Rugged Tablet PCs

The RPT is not a 'convertible notebook' with a swivel screen, but a compact, rugged tablet computer, that offers notebook performance in a device you can easily hold in one hand.

With a choice of 8.4" backlit LCD or (new) 10.4" backlit LCD, and a range of flexible vehicle mounting options, the RPT comes in either 'Industrial' or 'Military' versions; with the 'M' variant including the option of MIL-STD461E compliant very low emission electronics.

RVC IV RANGE: Rugged Vehicle Mount CPUs

The RVC Series provide a durable, 'permanently fixed' or 'removable' in-vehicle CPU option that can be connected to an external keyboard, pointer device (mouse) and LCD, which you are free to locate anywhere in the vehicle. It's akin to a desktop tower PC, but a great deal more rugged.

RUGGED LCD RANGE: Pedestal & Panel Mount Displays

As well as rugged PCs and PDAs, we also supply a range of purpose built LCDs for use with our extensive range of notebooks, tablets or vehicle mount products.

Ranging from standard high brightness LCDs to LCD touch screens, and including pedestal mount, panel mount or stand-alone (with or without handles), these LCDs are as rugged as the computers they attach to.

RPDA V RANGE: IP54 & IP67 Rated PDAs

This rugged Personal Data Assistant product is the ideal mix: it offers the compact size of a consumer products; and offers the rugged features you need in a commercial-grade product.

Able to run either Windows PC for PDAs, or Win CE.net (meaning you can change operating systems if your application needs change, without having to buy another PDA!), the RPDA comes offers a large 4" LCD touch screen, large programmable hotkeys and a variety of ports and connectivity options, plus a range of snap-on modules, including GPS, barcode, RFID and digital compass, making it the most flexible commercial-grade PDA on the market!
